LUNATA Luminaire

Uniquely versatile for innovative lighting concepts. Sophisticated design with a clear, flat, geometric language of form – these fixtures have been conceived for representative rooms, communicative meeting areas and reception areas of office buildings and hotels. Apart from the direct or indirect light from behind the luminaire, the light effect ring enables you to implement fascinating effects. In an arrangement slightly offset from the ceiling, Lunata conveys an airy and floating spatial impression.

Family	Wattage / Lumens / Diameter			Mounting	Light effect	Beam	Color temp		Finish	Driver	CRI	Input voltage							
LUNATA
